Subject: FW: Risk Assessment #21363 has been rejected

Hello everybody,
Well it took them four weeks, but the risk assessment has been rejected.

It is considered that it is not aligned to the evidence or the health and safety of staff and students at UQ and it is not consistent with UQ's Living with COVID decision issued by the VC. Consequently, this risk assessment has not been approved."

I think I need some time to digest this and consider my options.

A few of the UQ effected staff are meeting at the Northey street markets on Sunday 20th at 10:00am. I thought I would go along again.

Cheers,
Mick.

Subject: Risk Assessment #21363 has been rejected

Hello,

Risk Assessment #21363 has been rejected for the following reason Tyson John Doyle Cronin rejected this Risk Assessment for the following reason(s) "Vaccination is a key measure for the University to minimise the impacts from the spread of COVID-19 and the decision to move to a vaccination requirement was subject to consideration of the prevailing scientific information and evidence at the time, and corresponding risk assessment. This local risk assessment [21363] has been reviewed. It is considered that it is not aligned to the evidence or the health and safety of staff and students at UQ and it is not consistent with UQ's Living with COVID decision issued by the VC. Consequently, this risk assessment has not been approved."

This risk assessment can either be amended and re-submitted or cancelled via the delete button.
