## Statement of Claim

Anna, Brendan and Adam are a voice for all Australian living men and women who have been harmed or experienced loss due to Covid-19 mandates. We hereby make this statement of claim dated 22 October 2022.

### Facts of the dispute

1. Free Australian men and women were denied freedom of choice without coercion to give informed consent whether or not to take the experimental Covid-19 gene therapy injection.
2. The experimental Covid-19 gene therapy injection was rolled out as a clinical trial, by the Greg Hunt's own admission. What is a clinical trial? According to the Medicines Australia website it is "an organised test of medicines and new treatment options involving patient and non-patient human volunteers. Clinical trials confirm whether medicines are safe and effective to introduce as new treatments for a particular disease or condition".
3. States and Territories backed by the Federal government, introduced mandates requiring employers and employees in a large cross section of industries to take the experimental Covid-19 gene therapy injection or face employment termination.
4. States and Territories backed by the Federal government, encouraged selected school age boys and girls to receive the experimental Covid-19 gene therapy injection. Selected schools introduced mandatory Covid-19 gene therapy injection for some students based on health information guidance from government.
5. A proportion of the population that were injected with the experimental Covid-19 gene therapy injection had an adverse event that ranged from mild to severe.
6. A proportion of the population that were injected with the experimental Covid-19 gene therapy injection died from adverse events.
7. State and Federal government enforced a ban through health regulators of alternative therapies such as Ivermectin and hydroxychloriquine being administered as an early treatment for Covid-19.
8. The Covid-19 gene therapy injection received TGA Provisional Approval prior to rollout.
9. 'Off-label use' of a medical devices

'off-label use' generally refers to the use of a therapeutic good for an indication or intended purpose that is not specified in it's Australian Register of

Therapeutic Goods (ARTG) entry. Therapeutic goods are included in the ARTG with either specific indication(s) or intended purpose(s).

The Therapeutic Goods Act 1989 does not regulate clinical practice. 'off-label use' is a clinical decision made at the discretion of the treating clinician who is responsible for obtaining informed consent from their patient and ensuring that the medical device is the appropriate treatment option and carries a positive benefit-risk profile. (TGA website 9/10/22)

10. In Australia, 2022, there were 92699 deaths (all cause) that occurred by June 30, which is 17.1% more than the historical average.

### **Details of the alleged wrong (The Charges of harm and/or loss)**

1. Fraud – The Defendants initiated, participated in and/or supported the declaration of the Covid-19 Pandemic in Australia based on false fraudulent information and data. The Defendants provided/supported provisional approval of the Covid-19 gene therapy injection as “safe and effective”. The Defendants participated in and/or supported the suppression of doctors and scientists voicing concerns of the risks posed by the Covid-19 gene therapy injection. The Defendants participated in and/or supported suppression/censoring of positive research data on alternative and natural therapies.

Violation of the Nuremburg Code – The Defendants mandated medical experimentation based on fraud without full informed consent. Under element 1 of the Nuremburg Code it states:

“The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion, and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision.”

2. Human Trafficking – Under the United Nations Office on Drugs and Crime states:

“Human Trafficking is the recruitment, transportation, transfer, harbouring or receipt of people through force, fraud or deception, with the aim of exploiting them for profit.”

The Defendants, through their mandates in the form of force, fraud and deception, effectively operated as recruiters of Australians to be vaccinated on behalf of pharmaceutical companies who then exploited those same Australians for profit.

3. Genocide (incl Attempted) – The Defendants knowingly mandated/supported an experimental drug where the Defendants would have/should have reasonably known the heightened risk of death/injury.

### **Remedy to the wrong being sought**

Minimum of 30 years imprisonment for each charge to be served consecutively without parole.

Financial compensation to be set by the Crown Executive Orders Grand Jury.

### **The Defendants**
